

Technical Information - Warranty

At a glance

Structural: A 10 year insurance backed guarantee as standard on all our new buildings.

More detail

The Low Carbon Construction Building System can be insured by most major warranty providers, as well as having BBA and BM Trade certification. The SIP panels are manufactured to the highest standard under a documented factory production quality control system and have comparable durability to OSB/3 to BS EN 300.

Supply Partners

Within our buildings are many components that are supplied by our Supply Partners.

All our Supply Partners provide their own individual warranties that vary from partner to partner and are subject to change. In this respect you will find a link to the Suppliers website on our [Supply Partners](#) page where you will be able to obtain the most up to date information.
